

**LIVESTOCK, COLONIALISM,
CLIMATE CHANGE AND
INDIGENOUS**

means**

2024

The consumption of red meat from animals brought by Europeans, milk and dairy derivatives, is one of the main causes of climate change.

1

Cows and bulls arrived on the continent in 1493 when Christopher Columbus introduced the first cows and bulls of Spanish origin. Then the Spanish, Portuguese, English and other European colonizers continued bringing cows, bulls, sheep and goats.

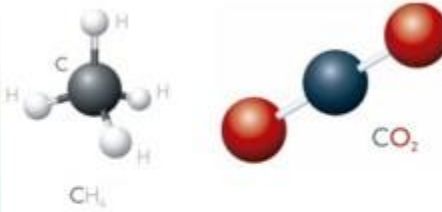

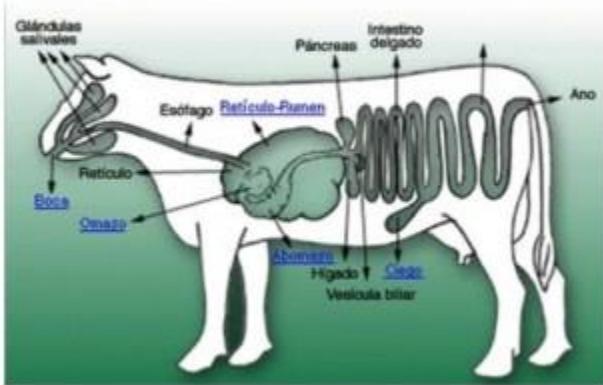

2

To make pastures, enclosures and slaughterhouses for these animals, many forests and jungles are destroyed. It is true that the oil industry is another of the main causes of climate change, but to make a garage for a car or other vehicle, not even a quarter of what is deforested is deforested to make pastures, enclosures and slaughterhouses for these animals.

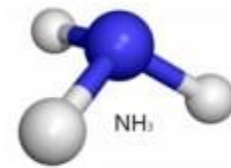

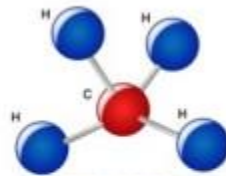

3

Cows and bulls have a larger digestive system than other animals, which is why they generate excessive emissions of carbon dioxide and methane in their gases and excrement.

4

The urine of cows and bulls generates many emissions of nitrous oxide, nitrogen and ammonia, and water and land are contaminated with the waste and blood of these animals.

5

It is necessary to remember that in addition to the army and the police, which in these colonialist countries have always acted as enemies of the indigenous people at the service of colonialist governments and colonialist elites: in the United States and Canada, the greatest enemies of the indigenous people and those who murdered indigenous people the most They were the cowboys.

6

It is necessary to remember that the extermination of indigenous people of the Selknam ethnic group in Argentina and Chile was caused by businessmen to use those lands for livestock farming that is dedicated to raising those animals brought by the Europeans and that it was the same thing that happened with many indigenous ethnic groups throughout the continent where the perpetrators were mainly ranchers who raised those animals brought by the Europeans.

It is necessary to remember that the Amazons where indigenous ethnic groups live are destroyed in a large percentage by the livestock that is dedicated to the breeding of those animals brought by the Europeans, and that the large percentage of soybean cultivation that causes destruction of the Amazons is used to produce fattening concentrates for these animals.

8

For all this: the consumption of red meat from animals brought by Europeans, milk and dairy derivatives is something totally immoral and totally unethical.

And both the belief in the god of the Abrahamic religions (Jewish, Christian and Islamic), as well as the atheism, skepticism and agnosticism that place Western science and Western technology above all, are destroying the planet. And most are more interested in knowing if life exists on other planets than in caring for life on this planet.

10

All these people who say that indigenous people lived in the Neolithic or the Stone Age are murderers.

From the arrival of the colonizers to the present, governments and elites have used saying that indigenous people live in the stone age or in the neolithic to justify genocide, extermination, and replacement by whites and mestizos.

And the colonizers also said those phrases that the indigenous people are backward, from the stone age or the neolithic to justify hatred, abuse, massacres, extermination and replacement.

But: What does it mean not to be backward, not to live in the Neolithic and not to live in the stone age for these criminals?

It is building cities full of garbage, noise and without vegetation.

The indigenous houses made with stone, straw and other natural materials did not cause a negative impact on the environment. While the houses built by those who are not indigenous are a complete destruction of the environment, that is why, when governments give bonus houses to the indigenous people or, as in the case of the United States government, they force the surviving indigenous people to live in cement houses that is colonization.

Not being backward, not being from the stone age and not living in the neolithic for these criminals is seeing nature as a simple economic resource as their Judeo-Christian god teaches, using oil, throwing garbage and excrement into the rivers, and thinking only in the money.

For these criminals, it is hunting for pleasure without being a necessity to survive, cockfighting and bullfighting, since for these criminals the ability to feel by having a nervous system is not what matters and they see animals of other species as things.

For these criminals, it is the livestock that is dedicated to raising bulls, cows, sheep and goats brought by the Europeans, where forests and jungles are destroyed to make pastures, enclosures and slaughterhouses for these animals, where excessive emissions of methane, carbon dioxide, nitrogen and nitrous oxide are generated that nature cannot process as they are excessive. For these criminals it is that cowardice of social Darwinism where, according to them, eliminating the weakest and most vulnerable is strength, virility, manliness or power according to their criminal way of thinking.

They also associate the use of clothing with civilization, without analyzing that this simply arose from the cold, Europe was colder than other continents in the past, and it was simply a way to protect oneself from the cold, and that it has no relationship with intelligence.

So the concept of civilization, progress and development that these criminals, the governments and elites who think like them, have, is simply garbage.

The indigenous people were not from the stone age, nor from the neolithic, nor backward, they simply used natural materials to build that did not generate

such a harmful impact on the environment, and with the passage of time some things also changed, it is known that with The passage of hundreds of years modified some things, and if the colonizers had arrived in the year 1800 or 1900 they would have encountered different indigenous people who would have made colonization not so easy.

Also, most consider beauty to be white European, blue eyes, and blonde hair. When in reality, the reddish skin of the indigenous people protects them better from the sun, their slanted or almond-shaped eyes protect them better from the sun and the impact of the wind, their black hair is more resistant to the sun, their medium or small size protects them from problems back, and many indigenous people have athletic or muscular bodies, and all these characteristics give them physical beauty and attractiveness, especially the shape of their eyes, their smooth and reddish skin, and their hair.

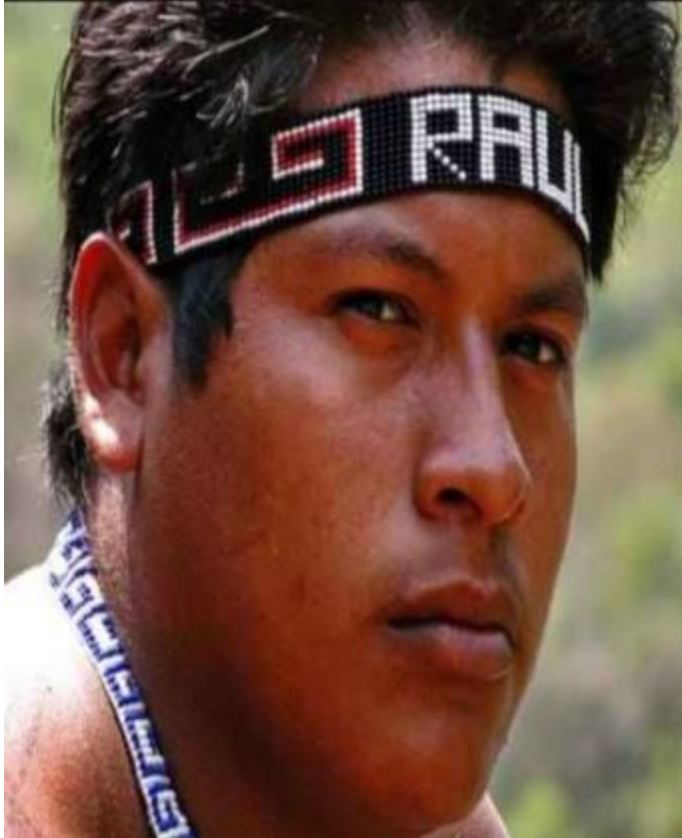

In fact, in an ideal world, beauty would be those characteristics and not European characteristics.

The reddish skin of the indigenous people also absorbs vitamin D better from the sun, which is why the colonists taught them to wear clothes when the

natural thing for many indigenous ethnic groups was nudity or semi-nudity, in addition to transmitting viruses and diseases through exposure and the clothing that was used for genocide, it also made it difficult to absorb vitamin D from the sun.

It is absurd that most believe that white skin is better, when it develops more skin cancer, is less resistant to the sun, is rougher, is more irritated and has more hair on the body, which makes good hygiene difficult.

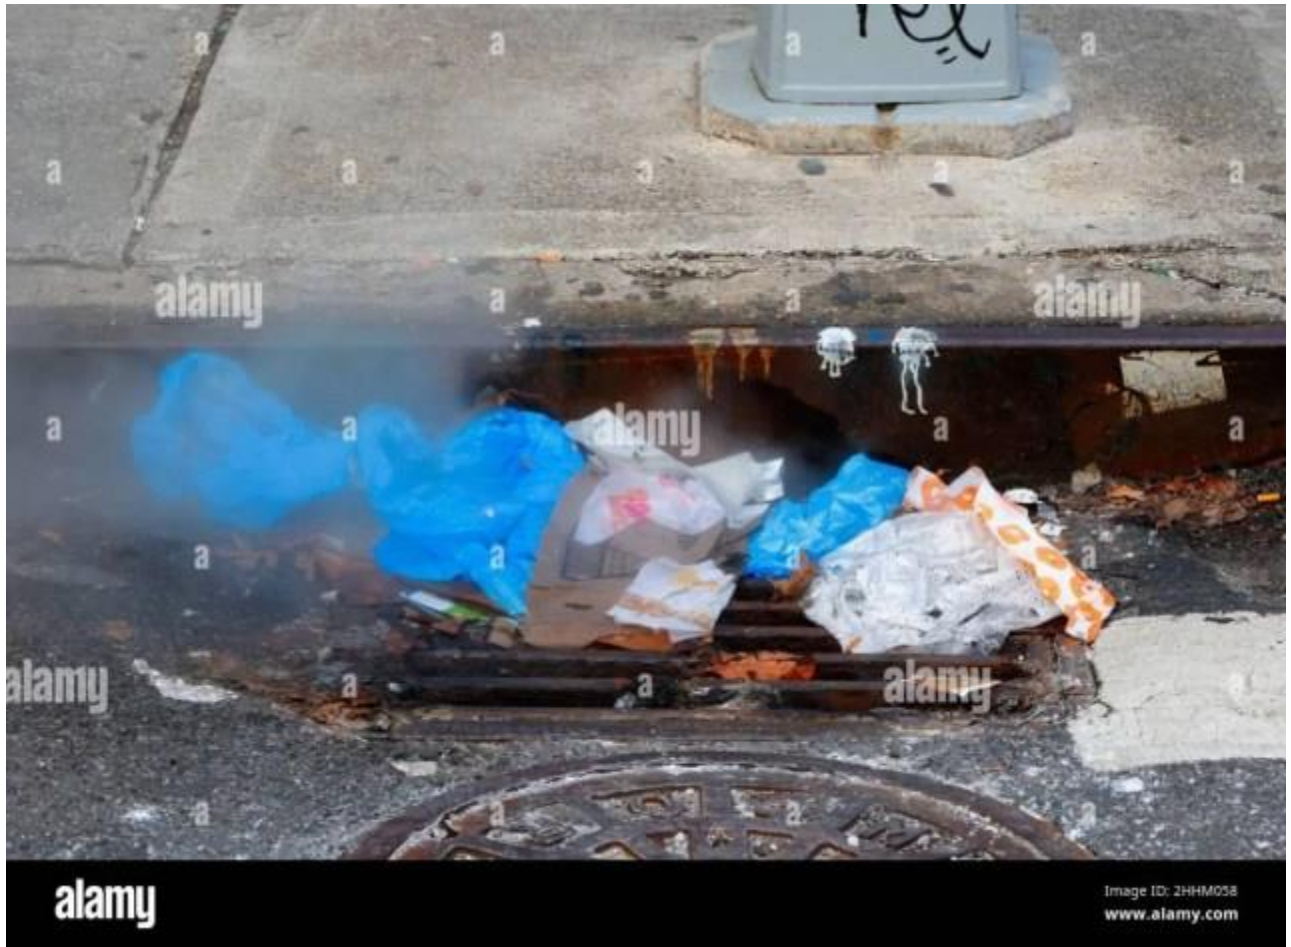

It is absurd that the majority believe that height is better, when this causes greater back problems and greater spinal problems.

It is absurd that the majority believes that rounder and lighter eyes are better, when rounder eyes are damaged more by the impact of wind and lighter eyes are damaged more by sunlight.

It is absurd that most people consider that blonde or light hair looks better when it is more damaged by solar radiation.

The majority, Hispanicists (defenders of Spanish colonization), defenders of Portuguese colonization, defenders of English colonization, defenders of French colonization, governments and elites in power say that progress, development, civilization, superiority and intelligence is this

alamy

Image ID: 2DKMKC2
www.alamy.com

Since the only thing that matters to them is money and Western technology, not life, they call the pollution and destruction of planet Earth progress, development, civilization and intelligence, and the breeding of bulls, cows, sheep and goats brought by Europeans that destroy forests and jungles to make pasture for these animals, which generate large emissions of carbon dioxide, methane, nitrogen and nitrous oxide, they think it is something very beautiful and that's why they admire cowboys, and they believe that the taste for the red meat of animals brought by the Europeans, for milk and dairy products, is above life.

I believe that the planet is on the path to destruction because the majority of humanity has always been allowed everything, everything has been justified to them and they have never been given what they deserve. And also Judeo-

Christian beliefs cause this because they are anthropocentric, they put the human being above everything, and they make people believe in the stupidity that the human being can live without the rest of nature and the majority believes that the economy is more important than protect life on planet Earth. And it is not fair that the majority of humanity drags those of us who think differently than the majority into the abyss.

Many times, Facebook has censored and deleted my accounts as shown in the following screenshot where on May 11, 2024: they applied a sanction of not being able to publish until May 18, and I received a notice that If they report any comments to me again, Facebook can close my account.

My Facebook account is in danger of being deleted. But, for these people, no matter how much I report the comments, they do not delete the comments or the accounts. Many Europeans, in addition to being racists, are also ignorant people who believe that Creoles, mestizos and anyone born on this continent are the same as indigenous people.

Facebook, Twitter (X), Instagram and YouTube allow hateful comments against indigenous people, not delete those comments even if they are reported and they do not delete the accounts that make them, there are criminals like these who write that the Europeans cleaned up the savages, who write that all countries should do the same thing that the United States did with the Indians, and those social networks and YouTube allow them and do not eliminate the accounts that make them, that is why they are complicit in the genocide.

Also, Paqui Avila shares this publication that mentions the 2030 agenda to deny climate change, the thing is that all these clowns are believers in conspiracy theories invented by conservatives who deny climate change:

1

These criminals also love to play victims (victimize themselves), they say that denouncing the crimes committed in colonization is hatred of Europeans, in the case of Hispanics they say it is hatred of Spain.

But, none of these criminals suffer everything that the indigenous people suffer at the present and they say that the indigenous people play the victims. The perpetrators always pretend to be victims, but they say that the real victims pretend to be victims.

They think they are very intelligent, and they believe that criollos and mestizos are the same as indigenous people. It's like when they talk about the conspiracy theory of the great white replacement, they love to play the victim (victimize themselves). When in reality the only ones who suffer replacement are the indigenous people, but if I mention that to them, they say that I victimize the indigenous people and that I make them out to be victims.

The following Hispanicist from Spain who uses the name Manuel Yeste Rodriguez made the following comment: -How disgusting the stinky indigenist are, nor did they know stinky soap, until the bearded people arrived and taught them how to wash.

Manuel Yeste Rodriguez

Que asco dan los apestosos indigenistas ni conocían el jabón apestosos, hasta que llegaron esos barbudos y les enseñaron hasta a lavarse

3 d **Me enfada** Responder

Esté Manuel Yeste Rodriguez proves to be an idiot: he confuses indigenous people with indigenists when they are not always the same, one thing is indigenous and another thing is indigenists, an indigenist can be of any race because being an indigenist is defending the indigenous people and one does

not need to be indigenous to defend the indigenous. In fact, non-indigenous people who are indifferent to what indigenous people suffer are complicit and just as guilty.

What Manuel Yeste Rodriguez does is just as stupid as if someone wrote that a human who protects the environment is the same as a tree 😊, or that a dentist is the same as a tooth 😊, therefore, these pseudo-intellectuals lack neurons.

All Hispanists (defenders of Spanish colonization), like those who defend Portuguese, English or French colonization: hate the indigenous people, even though they deny it, and many times they have the cowardice to hide their hatred of the indigenous people by saying that colonization helped the indigenous people or improved their lives, but they always show their hatred when they make humiliating comments that denigrate the indigenous people, treating them as inferior, bad, backward or that they did not provide contributions.

When they are European Hispanists or even many Europeans, even if they are not Hispanists, they believe that criollos and mestizos are the same as indigenous people. And all of these Hispanicists are religious fanatics, which is why they defend Christian religions and they are all believers in conspiracy theories such as those that deny climate change.

For example, Manuel Yeste Rodriguez writes in a comment the following: – It has already been demonstrated with evidence that this religion that idiots call climate change does not exist.

Manuel Yeste Rodriguez

Hermes ya se ha desmontado con pruebas que no existe esa religión de los idiotas llamada cambio climático que hace unos años se llamaba calentamiento global, pero como se demostró que no había calentamiento le cambiaron a cambio y siempre hubo cambios climáticos en toda la historia solo los muy cortitos todavía se creen esas cosas de gente retrasada y que sepa y entienda que lo mejor que le ha pasado a hispano-america fue el descubrimiento y conquista por parte del imperio español con mucho lo mejor que les ha pasado, ya que todas esas tierras y sus gentes vivían un infierno de guerras tribales y canibalismo por falta de animales ganaderos lo sustituían con carne humana estaban poco más que en la edad de piedra ni conocían la metalurgia ni la imprenta ni la rueda los antiguos españoles consiguieron apaciguar y civilizar y así crear un paraíso del infierno en el que vivían

20 min **Me divierte** Responder

It is stupid that he writes that it has already been proven that this religion of climate change does not exist, I did not know that there was a cult that performs rituals and prays to climate change 🤪🤪, I did not know that there was a religion that lights candles to climate change and makes songs of worship to climate change 🤪🤪, it is

seen that these ignorant people do not know the meaning of the word religion.

Furthermore, climate change is not a dogma, it is a fact accepted by the majority of scientists. In fact, it is the Christian religions that deny climate change and not science.

And with proof that climate change does not exist, he refers to everything that conservatives who invent conspiracy theories write and everything that these crazy people say in videos, crazy people who are just as conservative and religious fanatics of Christian religions as he is, and other of these crazy people are New Age. In fact, only idiotic and imbecile people can believe in Hispanists (defenders of Spanish colonization) or in defenders of other forms of European colonization such as the Portuguese, English or French, because all of them equally: they are religious fanatics who defend Christian religions and deny that those religions committed crimes that they themselves accepted, and they all believe in conspiracy theories that deny climate change.

In the following comment, Manuel Yeste Rodriguez writes to me: - poor character without culture and manipulated by the greats.

Manuel Yeste Rodriguez

Hermes hablar contigo es más inútil que lavar las patitas a un burrito eso está claro, pasa de mí pobre personaje sin cultura sin opinión propia y manipulado por los grandes, das mucha pena, la verdad hablas como los tarados fanáticos, venga olvidame de mi pesado cansino, ni sabes escribir ni menos razonar.

5 min **Me divierte** Responder

And these were my responses to Manuel Yeste Rodriguez:

Manuel Yeste Rodriguez: – but, yes, the big ones promote hatred of indigenous people with films and series that celebrate cowboys, that present indigenous people as savages and ignorant, and on this continent the governments and elites oppress the indigenous people, The big ones promote Judeo-Christian beliefs in the Judeo-Christian god, the devil, Jesus Christ, angels and demons through movies, series, television programs and cartoons, and the big ones support bull and cow farming, the big ones like George Bush Sr denied the existence of climate change, but it seems that the majority and conservatives who invent conspiracy theories lack neurons.

Manuel Yeste Rodriguez: – those you call great, who are the elites and governments, have the same concept of civilization, progress and development, which consists of placing money and Western technology above life, those you call great are the who promote the fascination with finding life on other planets so that the majority do not care about protecting life on this planet, and the Rockefellers so mentioned by conservatives who invent conspiracy theories: the Rockefellers became millionaires through the oil

industry , which is why those conspiracy theories that deny climate change only benefit those elites who are dedicated to the sale of oil.

It is surprising how all these Hispanists (defenders of Spanish colonization) as well as those who defend Portuguese colonization, English colonization and French colonization: always, although they believe themselves to be very intellectual, superior, cultured and intelligent like Agustín Laje, Dalas Review, Emmanuel Danann and Dross Rotzank, always demonstrate their stupidity, their lack of critical analysis and their lack of logic.

It has always surprised me that the majority of humanity, when they read what those conservatives who invent conspiracy theories and those defenders of colonization write or watch the videos of these people, never analyze that everything they write and say in videos is stupid.

But the reason why hatred of indigenous people is promoted even because of their physique is because these criminals in power are also interested in eliminating indigenous people and promoting their replacement by genetics. The problem is that in the present much of Hispanidad (defense of Spanish colonization), defense of Portuguese colonization and English colonization has been used to promote hatred of the indigenous people of the present. Governments that have caused massacres of indigenous people in the present and have made hate speeches against indigenous people, such as Jair Bolsonaro, Jeanine Añez, Guillermo Lasso and Donald Trump, who favored an oil pipeline in the United States to invade indigenous territory, have used the speeches of those who defend colonization to harm indigenous people of the present and these governments are related to VOX of Spain. Furthermore, those who defend colonization never mention anything good about the indigenous people, for them everything indigenous is bad and they always claim that they did not provide any contribution, and logically that favors the oppression and hatred of indigenous people of the present. Also, it happens that many Europeans confuse Creoles, mestizos and all those who are born on this continent with indigenous people when they are

not the same, and that favors making the true indigenous people invisible and the oppression of indigenous people in the present.

I believe that many of us would not care about colonization in the past if it did not affect indigenous people in the present and if it did not affect the environment in the present, the problem is that the livestock brought by the Europeans is one of the main causes of the climate change in the present. And that many Creoles and mestizos despise indigenous people in the present and vote for governments that harm them, this hatred is an inheritance from their colonizing ancestors, because in the end the majority of mestizos, even if they are mestizos with indigenous features, despise the indigenous people, and they have the same way of being, thinking and vision of the world as Europeans.

It is true that the vast majority does not directly go to kill indigenous people, but if they vote for politicians who harm them and who allow harm to be done to them, if they are indifferent to the lives of indigenous people, despise indigenous people and mock them, They consider them backward, ignorant and something of the past, and they consider the lives of the indigenous people as disposable, which is why the majority participates in the extermination of indigenous people.

And when the majority eat red meat from animals raised in captivity and brought by Europeans, when they drink milk and dairy derivatives, the majority is participating in the extermination of life because to make pastures for these animals many forests and jungles are destroyed, cows and bulls generate excessive emissions of methane and carbon dioxide, and the urine of cows and bulls generates many emissions of nitrous oxide, nitrogen and ammonia, in addition, water and land are contaminated with their waste and blood.

Therefore, the majority are murderers by not stopping consuming red meat, milk and dairy products, and with that they kill those animals brought by the Europeans, they kill wild animals by destroying forests and jungles to make pastures, they kill indigenous people because the The majority of invaders of

indigenous territories are ranchers who are dedicated to raising those animals that the Europeans brought and kill the planet.

They often say that there are like 60 companies that generate the majority of emissions that cause climate change to take responsibility away from the majority, but if these companies generate those emissions it is because the majority buy their products.

When non-indigenous people harm indigenous people, they are never considered terrorists, uncivilized and savages for it. But, when the indigenous people defend themselves or take revenge, they are always treated as terrorists, criminals, uncivilized or savages by the media such as television, by politicians, by the police, by the military and by the majority.

Most of them watch cartoons, series and movies where hatred of indigenous people is promoted, where they are generalized and put into my bag, where they are treated as savages and ignorant, where the cowboys who murdered them are considered heroes, and where it is implied that the destiny that cannot be changed of the indigenous people is domination, subjugation, hatred, extermination, contempt, humiliation and replacement by European immigrants, by Creoles, by mestizos and by others ethnicities that are not indigenous.

The majority consider that civilization, development and progress is throwing garbage and shit into the rivers and the sea, living in polluted cities full of noise, garbage and without vegetation, and Western technology, that is what they call civilization, progress and development. And most only care about money and technology.

The police and military who spy on the indigenous people, who expel them from their territories, who oppress them, who murder them and who hate them as part of the colonial society in which we continue to live, are considered heroes and good people by the majority.

The majority consider indigenous features such as their reddish skin, black hair, small or medium size, and slanted or almond-shaped eyes as something rejectable, and their concepts of beauty revolve around white and European. When religious leaders such as Catholic priests and evangelical pastors sexually abuse or rape minors, the majority justify them by saying that they are simple errors when the abuse and rape of minors are not errors, and the majority is complicit in wanting to cover up these criminals and to remain silent on the matter.

Most believe in conspiracy theories invented by conservatives that benefit themselves and Christianity, and that present them as the victims, when the only ones that the Masonic elites want to replace and eliminate are the indigenous people as I demonstrate in my books, not most.

When the Protestant inquisition and the Catholic inquisition happened, the majority supported the torture and murder of people who were burned alive at the stake and for the majority that was entertaining, just as they see it as entertaining or a sport, hunting for pleasure, bullfighting and cockfighting. So both the majority of the past and the majority of the present are bad, they have no forgiveness or justification. But, the majority has always believed that they are good because they are the majority, and currently there are films that, although they recognize that the majority are bad, always justify the majority and say that they deserve another chance when the majority has already had thousands of opportunities to change and they didn't.

The CIA and USAID continue to be related to the oppression and extermination of indigenous people throughout the continent, governments and elites consider indigenous people to be simple resources or objects to satisfy their sadistic and predatory impulses, but the majority is totally indifferent.

The left throughout the continent with pacifism, Christianity and placing as a priority those who are not indigenous above the indigenous, and the indigenous people are only given crumbs to keep them happy: it serves the

Right and the Neoliberals, therefore, After a left-wing government, a right-wing government always arrives, and for the Masonic elites it is a form of balance through the black and white checkered floor, the blue apron and the red apron, to maintain that system of domination of the indigenous people for the benefit of the majority who are not indigenous.

The defense of Spanish colonization (Hispanists and Hispanidad), of Portuguese colonization, of English colonization and of French colonization gain power and popularity in the world, and always promote the idea that what is European is civilization, progress and development, and that everything indigenous is primitive, reprehensible, backward, bad and that its extermination is ethnic cleansing. Nazism and Zionism gain power in the world.

The majority are selfish, individualistic, very noisy, they never balance moments of silence, they value the complicated and hate the simple, they are conceited and have a superiority complex.

Most believe that dominating, subduing and harming the weakest is power.

Most believe that dominating, subduing and harming the most vulnerable is strength. For this reason, the majority always express their sadistic and violent instincts with the weakest and most vulnerable. Most never express their sadistic and violent instincts with those who harm the weakest and with those who harm the most vulnerable.

YouTube, Facebook, Twitter and Instagram also allow hateful comments towards indigenous people, while when it comes to hateful comments towards those who are not indigenous they immediately delete them and delete the accounts, this is partly because they serve those who are in power and in part it is due to the indifference of the majority with the lives of the indigenous people and that the majority always perceives the indigenous people as the past.

Conspiracy theories invented by conservatives make the majority who are not victims pretend to be victims, make them victimize themselves.

It is true that the large percentage of the majority are from the so-called poor class and the so-called middle class, but they have money to eat, they have money to go to the doctor, they do not suffer expulsion from where they live, they do not suffer hunger, they do not suffer genocide, They do not suffer oppression, they do not suffer invasion and they do not suffer massacres. Therefore, even if they are from the so-called poor class or the so-called middle class, they are not victims, and they also think the same as the majority of millionaires and the elites.

So like the majority, although the large percentage of that majority are from the so-called poor class or the so-called middle class, in order not to suffer from what was mentioned above, they are privileged, and they are not victims. The real victims throughout the continent are the indigenous people.

But, the conspiracy theories invented by conservatives make the majority pretend to be the victim without being one (that they victimize themselves), that they hate minorities and that they say that the real victims play the victims (they say that the real victims they become victimized).

I know that the majority of poor people and the so-called middle class are in their way of being, thinking, in their beliefs and vision of the world the same as the majority of millionaires and elites, and when they meet people with money that is classist feel admiration for those people and treat them like kings, even though those people see them as less than. And I know this because I have met many poor and middle class people who are like that.

Many poor and middle class people from the countryside also humiliate, despise and make fun of the indigenous people, they also hunt for pleasure without it being a necessity to survive and they practice cockfighting, they also like to raise bulls, cows, sheep and goats brought by European colonizers. Also, they are fanatics of Christian religions, they are proud of the mestizaje, which is a form of extermination of indigenous people, they are hypocritical, they talk behind their backs, they are homophobic, they also consider that harming the weakest or most vulnerable is power, strength or courage, they

also prefer white, Western and European, and they also mock, treat as crazy and reject those who do not think like the majority.

They also see nature as a simple economic resource, they do not value silence, they are very noisy, they are selfish and individualistic and only care about money.

And logically there are exceptions among poor people, middle class people and millionaires, because in everything there are exceptions, but I am talking about the majority of the poor, the majority of middle class people and the majority of millionaires, not about the minority of the poor, not the minority of middle class people and not the minority of millionaires.

The system is the beliefs, values and ways of thinking of the majority, and those conservative idiots who invent conspiracy theories call themselves anti-system, and defend the beliefs, values and ways of thinking of the majority.

The devil is a Jewish invention, just like the god of the Bible. One real thing that these people who make up conspiracy theories say is that the entertainment industry, such as movies, cartoons, and series, is run by elites. But, what these clowns do not say is that this entertainment industry of movies, series and cartoons that is managed by the elites, in addition to promoting hatred towards indigenous people, also promotes Judeo-Christian beliefs in the god of the Bible, in the devil, in Jesus Christ, in angels and in demons.

The fictional characters of Jesus Christ and the angels are servants of that god invented by the Jews. The god invented by the Jews in the Bible always condemns with death all magical practices and the worship of other gods.

Therefore, what the New Age and its different sects, Theosophy, Freemasonry and the Rosicrucians do, of mixing the worship of the Judeo-Christian god, the angels and Jesus Christ with the worship of other gods and magical practices, is a matter of stupidity.

And the presidents and soldiers who expelled the indigenous people from their territories, reduced the indigenous population and caused the

extermination of the majority of the indigenous people, in addition to belonging to Christian religions, were also Masons.

Those who invent conspiracy theories say that governments and elites are all powerful and intelligent, in reality governments and elites are stupid since they worship the god of the Bible, support everything Judeo-Christian, hate indigenous people, support Israel and They belong to Christian religions.

But, at the same time, these governments and elites in power are Freemasons, Rosicrucians, Theosophists, they pay spiritualists, they go to New Age therapists and where New Age witches who mix the worship of other gods and magical practices with worshipping the Judeo-Christian god who condemns the worship of other gods and which condemns any form of magic. Therefore, the world is not ruled by all-powerful and intelligent people. The world is ruled by psychopathic, crazy, incoherent sadists who believe in stupid things.

It should be mentioned that this stupidity of Christian occultism arose in Europe inspired by Christian Gnosticism from the Middle East and stated that it is stupid because the Christian god in both the Bible and apocryphal gospels condemns any practice of magic.

The Abrahamic and monotheistic religions (Jewish, Christian and Islamic) emerge in the Middle East, but it is from Europe that they expand to the world, and atheism emerges in Europe, It is curious that in Europe and the United States things emerge that pretend to be contrary when in reality they are sides of the same coin.

Also all the wars, invasions, colonizations and genocides caused by the governments of Europe and the United States are hidden human sacrifices. And these governments and elites hate indigenous genetics, so to eliminate the indigenous they use two strategies, one is to replace the indigenous people directly with Creoles and European immigrants as Canada and the United States did, and the other is miscegenation as the Spanish colonizers

and the Portuguese colonizers did, but the two strategies seek the same purpose.

Governments and elites are also stupid and not intelligent because they are destroying the very planet where they live. The majorities are the ones who keep these elites and governments in power, that is why the majorities are their servants and not their victims.

Pacifism is a tool of domination that those in power use to dominate the indigenous people and make them not defend themselves. Those who harm the indigenous people are never called terrorists, nor savages, nor criminals, but when the indigenous people defend themselves or take revenge they are treated as savages, terrorists and criminals by television, by politicians and by the majority.

In Colombia, for example, the police and military expel the Emberá from their territories, attack indigenous people and even kill them, but when the Emberá defend themselves or take revenge they always treat them as terrorists, savages or criminals, and this happens in all countries on the continent.

Also, they say that the indigenous people seek that the state maintain them, when the only thing that the indigenous people ask for is that their territories be respected and that their rights be respected, not that they be maintained, and when the indigenous territories are protected, the indigenous people are self-sufficient and they produce what they consume without needing anyone or the state.

Also, they complain that the indigenous territories do not pay taxes, when that is fair because the indigenous people were before all of them on the continent, because of everything that the indigenous people have suffered and because the majority that is not indigenous exists on the continent for the extermination of indigenous people.

Even taxes should go to indigenous people because the majority is complicit in everything that indigenous people suffer and vote for politicians who harm indigenous people, and taxes should not go to genocidal politicians.

And another thing they say to deny rights to indigenous people is that we are all equal and that indigenous people should not have different rights, when it is not true, we are not all equal, genetics does influence behavior and indigenous people are better than They because they are less consumerist, they respect nature more, they are humble, simple, they value silence more and their physical features are better.

Furthermore, the fact that the indigenous territories do not pay taxes is fair for having suffered invasion, extermination, abuse, reduction of their population and replacement, half of each country on the continent should be protected indigenous territory and the indigenous people should have advanced weapons.

That all human races coexist in peace in the same place, multiculturalism: contradicts nature. In nature, each species lives in its ecosystem and the same must have been the case with humans: the whites stayed in Europe, the blacks in Africa and this continent was only for indigenous people.

Furthermore, it is proven that each human race is ethnocentric by nature. And in addition to all this, the majority that is not indigenous will never live in peace with the indigenous people due to the differences in terms of worldview, way of being and way of thinking, and those differences are determined by genetics.

Both the majority of Creoles, the majority of European immigrants and the majority of mestizos should go to Europe to live there forever because they have the same vision of the world, the same way of being, the same tastes and the same way to think, and leave the indigenous people alone on this continent and let the continent be governed only by the indigenous people. Also, whenever the majority of non-indigenous people coexist with indigenous people: the non-indigenous people are placed as a priority above the indigenous people. And the majority of non-indigenous people always try to impose their Judeo-Christian beliefs, their way of being, their way of thinking, their ideologies, their Judeo-Christian morals and their vision of the world.

Only the few European immigrants, the few Creoles, the few mestizos, the few blacks and the few mulattoes who do care about the lives of the indigenous people, share the same way of being as the indigenous people, share the same way of thinking as the indigenous people and they share the same worldview as the indigenous people should stay on the continent, but let only the indigenous people rule the continent, and those who are not indigenous preferably do not reproduce and rather adopt.

And whenever the majority of non-indigenous people live with the indigenous people: the non-indigenous people vote for politicians who harm the indigenous people, and the indigenous people suffer hatred, oppression, rejection, discrimination, contempt, invasion of territories, expulsion from their territories, genocide and massacres.

Therefore, only the minority of non-indigenous people who care about indigenous people should stay on the continent.

And the majority of non-indigenous people should go to Europe and live there forever with the Europeans that they admire so much and who according to them are like their brothers because they brought civilization, progress and development that consists of contaminating and destroying the environment in exchange of money and Western technology, which is the only thing that matters to them, because they brought livestock of bulls, cows, sheep and goats that deforest to make pastures and cause large emissions of methane, carbon dioxide, nitrogen and nitrous oxide, and because they brought religions Judeo-Christians that they love.

Of course, I do agree that indigenous ethnic groups from Asia should be received on the continent to save them since in Asia it happens that Asians who are not indigenous despise and oppress Asians who are indigenous, and I agree that indigenous ethnic groups from Africa are received since in Africa it happens that black people who are not indigenous despise and oppress black people who do belong to indigenous ethnic groups.

On the continent, things brought by the colonizers should be prohibited, such as: Judeo-Christian religions and their temples, Freemasonry, Rosicrucian lodges, the New Age, Theosophy, and the consumption of red meat from animals brought by the European colonizers, the consumption of milk and the consumption of dairy derivatives.

And most non-indigenous people try to impose absolutism (perfectionism) and duality: light against darkness, day against night, heat against cold, white against black, man against woman, darkness against light, night against day, cold against heat, black against white and woman against man.

The indigenous genocide continues in the present with the complicity of the majority of humanity that is indifferent, remains silent and considers indigenous lives as disposable. All those who defend colonization, whether Spanish, Portuguese or English, have indigenous blood on their hands, and the majority of mestizos also oppress the indigenous people and vote for politicians who harm them, the majority are destroying the planet and the cattle and bull farming brought by the colonizers causes a lot of deforestation to make pastures, a lot of carbon dioxide emissions , methane and nitrous oxide, those who invent conspiracy theories lie, climate change is real, there is no such thing as a great replacement of whites, who the Masonic elites have always wanted to replace are the indigenous people with Creoles and mestizos.
